

Introducing ...

Handypiece Pro™

FEATURES:

- ★ Ideal for shearing/crutching sheep, alpaca, or clipping cows tails
- ★ This is the first portable, low-voltage mechanical hand piece of its type to be designed and proven in a working situation.
- ★ Designed by a farmer for farmers – seeking an easier way of farming in today's environment.
- ★ Slim, comfortable and balanced to hold and operate.
- ★ Variable speed operation from 2400 - 3500 rpm.
- ★ 12 volt motor can be battery pack operated (attached to belt) or connected to farm vehicle, quad etc for ease of use. 240VAC - 12VDC inverter available.
- ★ Ideal for 'out the back' where a generator would be the norm.
- ★ Robust design, brushless motor, and easy to clean and maintain.
- ★ High torque brushless motor creates little heat build up.
- ★ Direct drive design – fewer moving parts mean a longer motor life.
- ★ Low current draw from lithium 12v battery. Crutch between 300–400 sheep, depending on dirtiness, or 400-500 cow tails.
- ★ Auto reset for overload or lockup.
- ★ Ideal to keep in your vehicle or ATV through times of fly strike.
- ★ International patents.

Handypiece ProTM

Introducing the Handypiece – Designed and manufactured by a farmer, for the farmer.....

After seven years of development we feel we have come up with the complete package that combines all of the requirements needed for the true portable handpiece – comfort, convenience and effectiveness.

Start out with a totally new Handypiece, we are offering our Handypiece Drive and power pack already attached to the new Lister hand piece. This unit is superior in that it has no vibration and is extremely quiet. The beauty of this system is that (unlike a lot of older hand pieces that are bushed) the “Handypiece” relies on a double roller sealed bearing behind the cam. This system will last for years.

Designed for on-the-spot, anywhere, instant results in butting, dagging and shearing flyblown sheep, fantastic for clipping cow tails

Kit: Lister Handpiece (Retail value \$760),
Handypiece Drive, 5m extension cable,
12v Lithium battery pack and charger, belt, holster & pouch,
screwdriver and oil bottle, carry bag.
Additional battery packs available on request.
